

CSE427 Group Project Timeline

Final Deliverables: Report (PDF), Code(ipynb), and a 5-minute recorded video presentation

✓ Week 1 – March 03, 2026 (Topic Finalization & Kickoff)

Student Tasks:

- Understand the assigned topic
- Conduct initial team discussion
- Start searching for relevant datasets and prior work

✓ Week 2 – Deadline: March 09, 2026

Focus: Foundation Building and Data Analysis

Deliverables:

- **In a Doc file:**
 - **Full Literature Review** – Brief summary of **minimum 3 relevant papers** per member for a 3 person group and **minimum 4 papers** per member for a 4 person group. 100 words per paper(150 max). Latest papers(post 2023) are preferred.
 - **Dataset Identified** – Include dataset name, source link, format, and a short description
- **In an .ipynb file:**
 - **The necessary codes you have done for EDA.**

✓ Week 3 – Deadline: April 20, 2026

Focus: Previous Work, Preprocessing and Baseline Model Implementation

Deliverables:

- **In a doc file/Latex(PDF):**
 - **Problem Statement** – Clearly define the problem being addressed
 - **Project Objectives** – List the key goals of your project
 - **Dataset Identified** – Include dataset name, source link, format, and a short description **along with Initial Exploratory Data Analysis (EDA) with visuals**
 - **Dataset preprocessing completed**
 - **Baseline Models Implementation (at least 3 model implementations)**
- **In an .ipynb file:**
 - **The necessary codes for EDA along with the model implementation you have done so far.**

✓ **Week 4 – Deadline: April 27, 2026**

Focus: All Model Implementation, Adjusting Preprocessing as Required & Evaluation

Deliverables:

- Models Implementation Continued (At least best 3 models)
- Dataset Preprocessing Changes if required
- Evaluate & compare implemented models
- **Full Project Report Draft** including the following sections:
 1. **Title Pages**
 2. **Abstract**
 3. **Introduction** (background, motivation, problem definition)
 4. **Related Work** (brief literature review)
 5. **Dataset Description**
 6. **Methodology** (data preprocessing, model, tools used)
 7. **Results & Evaluation** (metrics, visuals, analysis)
 8. **Discussion** (interpret findings, limitations, improvements)
 9. **Conclusion** (summary and future work)
 10. **References**
- Final **code** organized and documented in an **.ipynb file**

✓ **Week 5 – Deadline: May 05, 2026**

Focus: Final update on the report and code file based on the suggested modifications provided in week 3.

Deliverables:

- Final Report (PDF format)
- Final code organized and documented

✓ **Week 6 – Deadline: May 10, 2026**

Focus: Final Touch & Presentation Submission (No lab class)

Deliverables:

- Final Polished Report (PDF format)
- 5-minute **Video Presentation** (YouTube link):
 - Problem overview
 - Model and approach
 - Results and key insights
- Submit:
 - Final Report (PDF)

- Final Code + Dataset (if not too large)
- Presentation Video

Note: This week is for polishing and submission only, so no major implementation work should remain.
